Customize Your Schedule

1. After logging in, click on the **Schedule** tab to access the **Department Schedule**.
2. Click the drop-down arrow to the right of your name and click the push pin to the right of your **Department** name to see the **Calendar** view.

3. Select the drop-down arrow next to the **Department** name and left click to drop and drag your practitioner or resource (generic) schedule to your **My Schedule**.

4. Highlight your name under **My Schedule** to see the appointments for today.

Review Patient Information

1. Highlight an appointment on your **Schedule** to view additional patient information.
2. Review the **SnapShot** report on the **Report Pane** from the **Schedule**.

The screenshot shows a patient schedule table. The table has columns: Time, Status, Length, MRN #, Patient Name, Age, Type, Provider, Notes, CE, eCare Status, and Future Orders. The table contains two rows of data. The first row is for a patient named 'Adamite, Terry-Nurse' and the second row is for a patient named 'Adamite, Terry-Nurse'.

Time	Status	Length	MRN #	Patient Name	Age	Type	Provider	Notes	CE	eCare Status	Future Orders
9:00 AM	Arrived	15	U9045208	Adamite, Terry-Nurse	46-year old	OFFICE VISIT	Adamite, Terry-Nurse	follow-up		Pending	
2:00 PM	Scheduled	30	U9045319	Adamite, Terry-Nurse	31-year old	OFFICE VISIT	Adamite, Terry-Nurse	Back pain, headaches		Pending	

3. If this is a commonly used **Report**, you can create a button on the **Report Pane** toolbar, so you do not have to search for it every time.
4. Click the wrench on the **Report Pane** toolbar next to the **Search** field.
5. The **Add or Remove Buttons** from **Toolbar** window appear.
6. Click the **Add Current** button to pull in the current viewed **Report**.
*Hint: You can change the **Button Name** in this window to your preference.*
7. Click **Accept**, the button is permanently added to your **Report Pane**.

Rooming a Patient

Document the Reason for Visit

1. Open the **Rooming** activity tab and select the **Reason for Visit** section.

Reason for Visit	Vitals	Episodes	Care Everywhere	Care Teams	Hearing/Vision	Allergies	Med Review	Review
Verify Rx Benefits	Outside Meds	History	Screening	Questionnaires	Tasks	Consents	TIMEOUT	Preprocedure Checklist
Final Verification (Timeout)	Specimen Verification							

2. Use the speed buttons to select the **Chief Complaint**.
*Hint: If you don't see a button for the patient's chief complaint, search for it in the **Chief Complaint** field. Enter the first few letters of the complaint and press **Enter**. A list of matching complaints appears. Double-click a complaint to select it.*
3. Click one of the common **Chief Complaint** buttons. Or, in the **Chief Complaint** field, enter the first few letters of the complaint and press **Enter**. In the list of matches that appear, double-click a reason to select.

Reason for Visit

Chief Complaint

Follow-Up	Wellness	Medication Man...
Immunization or...	Establish Care	Other
Blood Pressure	Flu Shot	Cough
Follow Up Visit	Musculoskeletal...	Diabetes
URI	Well Child	

Chief Complaint	Comment

Document Vitals

1. Click the Vitals section to document the appropriate fields.
Hint: A Pain Score can also be documented under the Vitals section.
2. To add another set of vitals for this visit, click **New Reading**. A new column with today's date and time appears.

Review and Update the Patient's Allergies

1. Click the **Allergies** section.

Reaction	Severity	Reaction Type	Noted	Valid Until
Penicillins	Unknown	Low	4/6/2016	

2. To indicate that the patient does not have any allergies, select the **No Known Allergies** check box and click **✓ Mark as Reviewed**.
3. To indicate that you were unable to assess the patient's allergies, click **Unable to Assess**, then enter a reason.
4. To add an allergy:
 - Enter the first few letters of the allergy in the **+ Add** field and press **Enter**. A list of matching allergens appears.
 - Double-click the appropriate allergy and enter information like the type of allergy and the patient's reaction.
 - Click **✓ Accept**.
5. To update an allergy, click the name of an allergen and edit the information, as necessary.
6. If an allergy was entered in error, click **✗ Delete** and enter a reason for deletion.
7. When you are done updating allergies, click **✓ Mark as Reviewed**.

Hint: Marking a section of the patient's chart as reviewed is similar to initialing the paper chart. The chart is updated to indicate that you last reviewed the information, and the date and time appear.

Update a Patient's Current Medications

1. Click the Med Review section.

Prescribed	Taking?
atorvastatin (Lipitor) 20 MG tablet Take 1 tablet (20 mg total) by mouth 1 (one) time each day. Disp-30 tablet, R-11, Print Last Dose: Not Recorded Refills: 11 ordered Pharmacy: WALGREENS	☒ Taking ☐ Not Taking ☐ Taking Differently ☐ Unknown

2. Select or clear the Taking? check box to indicate whether the patient is currently taking a medication.

Pharmacy: No Pharmacy Selected

Patient Reported Taking?

SUMatriptan (Imitrex) 20	Taking	Not Taking	Taking Differently	Unknown		
MG/ACT nasal spray						

Administer 1 spray into one nostril every 2 hours as needed for migraines. Last Dose: Not Recorded

4. The **Remove Order** window opens, confirm the **Flag for removal** button is highlighted and click **Accept**.

Add a Patient-Reported Medication

1. In the **Med Review** section, click in the **Add Medication** search field, enter part of the medication's name and press **Enter**. A list of matching medications appear.
2. Double-click the appropriate medication.
3. Enter information about the medication, such as the dose, when the patient started taking it, and the frequency, click **Accept**.
4. When you have finished reviewing and updating the patient's medications, click **Mark as Reviewed**.

Verify the Patient's Pharmacy

1. Ask the patient if the pharmacy listed in the **Med Review** section is correct.
2. To change the pharmacy, click the **pharmacy name**.
*Hint: If the patient does not have a pharmacy, click **No pharmacy Selected** button.*
3. Choose one of the suggested pharmacies or search for the patient's preferred pharmacy and click **Accept**.

Reconcile Outside Medication Info

When another organization has a medication on file for the patient, a banner appears at the top of the **Med Review** section. This data can come from other organizations that see the patient or from an outside pharmacy.

1. In the **Med Review** section, click **Go Reconcile** in the banner that indicates medications from outside sources are available.

New medications from outside sources

Medications need attention. Go Reconcile

2. Review the information that appears in the **Reconcile Outside Info** activity.
3. Click  for any medications the patient confirms that they are taking. The **Medication Details** window opens.
4. Enter information about the medication ( means that an item is required) and click **Accept**.
*Hint:  appears next to medications that do not have an exact match in Epic. For example, a patient might report a brand name medication but not its strength. When you click , you must enter a matching medication in the **Medication Details** window.*
5. Click  for any medications that the patient denies taking.
6. When you are finished, click  **Accept** to add the reconciled medications to the patient's medication list.

Document Patient’s Medical, Surgical, Family and Social History

1. Click on the **History** section.

History
